

ECONOMIC CONDITIONS
ELECTRICITY SUPPLY PRICE

Offer valid until July 15, 2018

Power less than or equal to 10 kW			Power greater than 10 kW and power less than or equal to 15 kW		
	PROMOTION TIME / PERIOD	NON PROMOTION TIME / PERIOD	PROMOTION TIME / PERIOD	NON PROMOTION TIME / PERIOD	
POWER CHARGE* (SET)	€ 42.043426 /kW year		€ 49.532016 /kW year		
ENERGY CHARGE* (CONSUMPTION)	€ 0.069775/kWh	€ 0.148533/kWh	€ 0.088131/kWh	€ 0.152312/kWh	

VAT*, the electricity tax (5.11269632%), reactive energy and all other billing items shown will be added to these prices.

The price of the power charge and no promoted price and promoted price will remain unchanged for 12 months, without prejudice to its updating according to the variation corresponding to the CPI(1) on 1 January of each year during the term of the contract.

(1) IPC: actual accrued value, for the November-to-November period prior to the application of the variation, of the general Consumer Price Index published by the Spanish National Institute of Statistics.

Any upward or downward variations in the access rates and tolls, fees and the regulated items that the government approves for application during the term of the contract will be applied, based on Royal Decree 1164/2001 and IET/2735/2015 Order.

The Night Plan can only be subscribed for suppliers with a 2.0DHA and 2.1DHA Access tariff. If this rate is not available, on subscription, the distributor will be requested to change the rate. This will be at a charge of 9,04€ (excluding taxes) for the connection of your distributor. Iberdrola Clientes will offset that cost with the equivalent amount.

The energy will be billed as the product obtained by multiplying the no promoted prices and promoted prices by the consumption in the relevant period.

The aforementioned not promoted and promoted periods will be those legally established for network access rates at any given time.

The power will be billed as the product obtained by multiplying the daily power charge by the corresponding power to be billed, and multiplying the result by the number of days in the billing period. The daily power charge is obtained by dividing the annual power charge by the number of days in the year.

Reactive energy, where appropriate, will be billed by applying the reactive energy billing charge approved by the government, as established in the regulations. The electricity tax will be applied to this supplement.

If the Plan you sign up for does not fully suit your needs, you can switch to a new Plan whenever you like.

Signing up for this Plan is conditional on having activated the subscription to E-billing for the duration of the contract.

We also remind you that you have signed up for energy with Guarantee of Origin certification by the Spanish National Markets and Competition Commission (CNMC), which comes exclusively from energy sources certified as 100% renewable that avoid CO2 emissions.

METER RENTAL PRICE

The monthly rental price for the electricity meter will be established by the Ministry of Industry, Tourism and Trade for the corresponding access tariff, and charged by the distribution company. VAT(*) will be added to this price, which will appear on the bills issued to the customer. Customers may consult prevailing prices at www.iberdrola.es

DURATION OF THE CONTRACT

The duration of this contract is 12 months from the supply start date.

The supply start date shall be later than the date of acceptance of this contract and will be conditional on the existence of an access contract with the distribution company, the availability of the electricity and any work to be carried out on the installations, where necessary. The supply start date shall be the first day of the stipulated metering period indicated on the first bill.

The contract may be extended for annual periods in accordance with the General Conditions.

(*) The tax rate, which will be specified and broken down on the bill, will be the one in force at all times. VAT is not applied in the Canary Islands, Ceuta and Melilla, where the special tax system applied, respectively, is the IGIC (Canary Islands Special Indirect Tax) and the IPSI (Tax on Production, Services and Imports).
